How to Interpret this Document: This document shows main questions as well as sub-questions, as indicated in colored text. The response option that triggers a sub-question will appear in color (most are blue, though other levels of sub-questions also appear in red). The sub-question that relates to that response option appears immediately below and is in the same color as the response option that triggers the sub-question. If more than one sub-question follows from this one response option, the additional sub-questions appear below in the same color. If a sub-question has another sub-question within it, the same pattern follows (the response option that triggers the sub-question is in a color that matches the color of the text of the sub-question below) though it will be in a different color from the first sub-question.

4. In the above question, you indicated that you intentionally hurt yourself with the intention of practicing or committing suicide. Was practicing or attempting suicide the primary reason you intentionally hurt yourself?
   - Yes
   - No
   - I am not sure

If only these items are indicated or if #4 is answered yes, we exclude these individuals from the NSSI track and recode as no NSSI

C. Recency and Frequency (and age of cessation)

5. The following questions ask about your experience with intentionally hurting yourself. We know that this can be a difficult issue to think and talk about. Please note that there are web links on the bottom of every page and at the end of the survey with contact information you can use if you feel like you want to talk with someone. There is also a distraction button you can use to take a break if you start to feel triggered or at all uncomfortable. The information you provide about this topic will be used to help others who intentionally hurt themselves. It will take about 15 more minutes to complete this survey. Thank you in advance for your time and honesty.
